Bilateral Meetings

- Tuesday 08:00-11:00

Description

We are a small family business in the production of the traditional wooden boats. Everything started more than 10 years ago as a business idea. The love for the profession as an engineer of a father, the love and desire for freedom in the sea and a dream of a daughter connected them with father and son love for the history and boats. 2 ideas dedicated to the same thing, the SEA, the tradition became 1. LIFE ON A BOAT came from the family business ARTISANAL and the ALBANIAN SPORTS MARINE organization. Is a project dedicated to the traditional maritime life that started just in January 2017. In the last 2 years, we have offered to the market different models of classic wooden boats. We are working to complete the sailing programs for all ages and also our researching work for the Interactive Naval Museum is going on. Our plan for the next 5 years is to offer to the region the complete range of classic boats, a sailing team that can represent the country and the museum.
